

# THE EMPRESS EXPRESS

VOLUME XVII, No. 21

EMPRESS, ALTA. THURSDAY, Oct. 24, 1929

Price: \$2.00 Per Year.

## United Church

Church School, 2:00 p.m.  
Public Worship, 7:30 p.m.  
Special music will be provided at the evening service.  
Wainfleet, 11:00 a.m.  
Leland Hall, 2:00 p.m.  
Social Plains, 3:30 p.m.  
Work without worship means worry.

Rev. Geo. A. Shields,  
Minister.

## Lady of Chance

Miss Shearer, in the role of a telephone operator in a New York Hotel, manages to acquire a goodly portion of the wealth of flirtatious old men who don't understand that there must be a catch when a beautiful young girl seems to fall in love with them. She works with two partners, played by Lowell Sherman and Gwen Lee.

When she makes an extravagantly successful haul, she double-crosses her pals and flees with the spoil. Then she meets a very good-looking young man and marries him under the belief that he is a millionaire.

When she discovers he has no money, they make her pale and sipping thrills and climaxes. First of all, she finds he has really fallen in love. Then he makes good and her erstwhile pals appear on the scene for blackmail purposes. How she outwits them, the fight she makes for her happiness and the surprising tactics she uses to retain it make a picture of unusual entertainment. It has romance mystery and thrills and is a superb Shearer picture.

## Dr. Gershaw Visits Burnt Over Area

During his visit here, Dr. Gershaw reported that he had visited the burnt over area between Jenner and Cavendish, and estimated the area as 28 miles long by 14 miles wide. The fire has caused hardship for some of the settlers as it has denuded them of all feed for stock, and unless there is a very plentiful supply of moisture, in some of the areas now grass will not grow next spring as the roots are badly burned. Dr. Gershaw is of the opinion that relief is necessary for some of these people and intends to endeavor to see what can be done. He also expressed his interest in railway matters.

M. G. Boyd, has joined the local staff of the Imperial Lumber Yards.

## Chautauqua Entertainers Draw Large Attendances

Chautauqua opened here on Saturday to a big attendance. The programme as given by the Dixie Broadcasters met with the appreciation of the audience. On Monday, Miss Neville-Johns, gave an instructive address on Australia, and Lowell Patton and his artists gave brilliant musical entertainment in the afternoon and evening. Mr. Patton's part in the entertainment was highly appreciated. Private Post gave an interesting lecture. On Wednesday afternoon a slight off hand performance and in the evening the Martin Brwin players presented "Spooks," a drama in three acts. They gave a talented performance to a capacity house.

## Anglo Dutch Oil Co. Commencing Operations

Active development of the work by drilling to prove the Social Plains Oil Structure, is to be commenced immediately, and preparations are now being made. The location of the site, as stated by Mr. H. Humble, secretary of the Anglo-Dutch Oil Co., is S.E. sec. 15, tp. 29, rge. 1, w. of the 4th, and will be 100 yards from the south bank of the Saskatchewan river, and 12 feet above water line on the Strom farm. It has not been definitely decided yet whether the Company will grade a road to the site from the south or whether they will use the Vaughan trail and ferry for freighting their supplies to the site. Work was being cleared on Wednesday and cellar is to be dug today. Dr. Coulter was here on Monday and Tuesday, and made a visit to the proposed drilling site preliminary to the commencing of operations.

In a complete geological report on this structure, signed by Charles C. Coulter, geologist and paleontologist; C. E. Schenckel, topographer, geologist and draftsman; and Mentor Ely, assistant geologist and topographer, the following strong statement is made attesting the faith of the finders in the value of their discovery:

"We furthermore desire to invite any member or members of our profession, whether engaged in Canada, America or internationally, or not, as skilled or talented in this technical work, or not, to visit this wonderful oil structure and make their own deductions from their own conclusions, as to its geologic status and petroleum worth. Carefully check over our field determination, examine each stratigraphic member and complete geologic series. Construct in other words, a correct technical analysis of the region, and, when done, submit these findings to your principals with the free admission that it is the finest and most promising oil structure thus far discovered in Canada."

We are authorized to state that anyone interested in the present development from an investor's point of view, may obtain further information from Mr. Humble, secretary of the Company, during the few days he will be in Empress; or

## Fuego Well Is Blowing About Twenty-five Barrels of Oil

Word from Mr. Campbell, secretary of the Fuego Oil Co., is as follows: "The Fuego Oil Co. expect to complete cementing of their well this week. At the time of writing this well is blowing about 25 barrels of oil per day, and it is believed that when the water is shut off and the well cleaned out the production will be very much increased."

The contract for a new derrick will be let in a few days and everything made ready for an early start on another well next spring.

The company has now purchased a building in Oyen and are fitting it up for an office.

## Succumbs to Injuries Received in Railway Accident

News of the death of Jim McLean, was received here on Tuesday, October 22nd. Death was the result of an accident when descended slipped under a passenger train at Broderick and had a leg covered. He succumbed the same day to his injuries. Funeral services will be held this afternoon at Broderick, after which the body is to be taken East to Prince Edward Island for interment. Dan McLean will have charge of the remains on the journey to their last resting place. Wendell McLean left early on Wednesday morning from Alaska to attend the funeral service. We join in the general expression of sympathy to bereaved members of the family.

Broderick, Sask.—James K. McLean, 45, farmer in this district died Monday afternoon as the result of injuries received earlier in the day when his slip fell from the station platform under the wheels of a moving train. One leg was cut off and he received other injuries. He was taken to the local hospital, but despite medical aid, died shortly after.

Mr. McLean had gone to the station to say good bye to some friends who were leaving on the outgoing train. He had carried a bag on the train and slipped as he was getting off. Three brothers are living in Alberta and one sister, Mrs. Thompson, lives in this district.

from Mr. H. J. Duff, who has accompanied Mr. Humble from Calgary and who expects to stop over in Empress about two weeks.

## How Long Will We Live?

Statisticians are able to prove to us that, on the average, a child born today will likely live to 50 years of age instead of 40 years, which was the case in the middle of the last century. This has been brought about chiefly by better care of infants, a tremendous reduction in the diarrhoeas of children which used to take such a heavy toll of infant life, pure water, safe milk and improved sanitary conditions.

There has not been a corresponding increase in the expectation of life among adults. The expectation of life at 50 years of age is not appreciably greater today than it was during the past century.

One interesting point that we learn is that persons who are long come in contact of long-lived families. This does not mean that a member of a long-lived family is more likely to recover from an attack of an acute disease, but rather it is so because of an escape from an attack of an acute disease, such as those which destroy life in infancy and early adult years, such a person will be more likely to live to advanced years.

Many people have the idea that health work is aimed to prolong life. This is only partially true, because the ideal result is rather healthier years than more years. Because health and happiness are so closely linked together, it may be fairly said that the objective of health work is not to prolong life but to make people happier while they live.

## Richard Kent Stock Co. At The Theatre, Monday

On Monday, the Richard Kent Stock Co. present at the theatre a seven piece play, "The Reel". The story of a big fight between an actress and a Wall Street broker. A powerful drama. Reserved seats at Drug Store, 81 children, 25c.

We are in receipt of the following announcement: Mr. and Mrs. Annan Cameron, of Edmonton, announce the engagement of their eldest daughter, Hilda Violet to Garman Wesley, eldest son of Mr. and Mrs. Blake L. Dawley. The marriage to take place in the latter part of October.

We do not know why some families have what we might call greater vitality and so live longer than the average. We do not know why Old Parr lived to 152 years. It may be, of course, that many years have been added to his life in the retelling of his story. We do know, however, that, to the adult who desires to increase the expectation of years of health, we can say—moderately in all things is essential, as above all, in food. An interest in life must be maintained whether it is in work or in play, such as a hobby. Worry must be cast out as it is the thing which wears out the machine.

Questions, concerning Health, addressed to the Canadian Health Association, 184 College Street, Toronto, will be answered Personally by letter.

## FLY - - AVIATION IS GROWING

The biggest opportunity of the century awaits those who prepare and train now. Be an active student at home, gaining a knowledge of design and construction, navigation, instruments, meteorology, theory of flight, etc. A wonderful course prepared by expert instructors, rates are very low.

**CHEVROLET  
SIXES**  
**Sold this year**  
*as any other six  
at any price  
in any year!*

NO other six-cylinder car has ever earned, in any year, one-third the public acceptance... one-third the volume of sales... which have been bestowed upon Chevrolet Six during the nine months since its introduction.

This tremendous public acceptance is due to three outstanding facts. To the fact that Chevrolet offered, for the first time in history, a six at the price of a four... To the superb standard of quality in Chevrolet's design, material and workmanship. And to the new, greater performance abilities that Chevrolet Six provided.

Chevrolet Six was four years old in experiment, in research, in testing, in proving... before the first Chevrolet Six was placed on the market. And who followed his example... SOLD HIMSELF on the Chevrolet he bought... on the road, behind the wheel. Why not let us place a Chevrolet Six at your disposal... and form your own opinion of its value. ### Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing equal equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio. In exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the whole world which has no such a distinctly national flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English, if born in Scotland, they are listed as Scottish; in Ireland, as Irish; in France, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman although neither he nor his parents ever saw Ireland. If his grandfather had been born in Spain, then the writer would be a Spaniard.

In the face of such an anomaly, such a ghastly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire. Canada has a distinctive flag for its merchant marine, and by Order-in-Council it has been decreed that this shipping flag shall be flown on Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada have pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has no nationality under the sun except Canadian, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

### All Weather Road Promised

From International Boundary To Prince Albert National Park

An all-weather highway from Regina or the boundary to Prince Albert National Park will probably be put into condition, P. R. MacMillan, of Saskatoon, president of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, Hon. J. A. Merkle, was on a trip to the park was an evidence of the government's interest.

### HEALTH REGAINED

Mother and Daughters Restored Through the Use of Dr. Williams' Pink Pills

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White, New Canada, "and I give the credit to Dr. Williams' Pink Pills. I had been suffering for some years. I was weak and run-down; my heart had been beating violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did me no good. A second doctor was called in, but with no better results. I was told that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. I was still grasping at a straw, but six boxes of this medicine were sent for me, and by the time I had taken them I was able to sit up. Six more boxes were got and soon I was able to go about, my health steadily improving. The most beautiful results of the pills will be for me to praise Dr. Williams' Pink Pills. The trouble in both cases was the anemia, that so often comes when girls are entering womanhood. Under the use of these pills, my health was regained, strength and activity you can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I think this will benefit my experience."

You can get these pills from any medicine dealer or by mail at 30 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Escape From Submarine

Men Leave Submerged Craft In Record Time During Experiments

Ten men emerged from the sunken submarine T-17 in forty-eight seconds during a submarine experiment in Italy. This is the fastest record for such a feat.

Half of the participants used head pieces, the others wore helmets. The helmets were equipped with a large built-in device consisting of a large bottle containing a gas which permitted the men to breathe while submerged without water entering the hull.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. T. J. Egerton's medicine for the treatment of many ailments would not be without it in the home. It is truly a household medicine and as it is effective in dealing with many ordinary complaints, such as colds, influenza, and other ailments, it is an indispensable medicine. So, keep it at hand, as the call for it may come most unexpectedly.

### What Is a Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England once has decreed that the words "Bank of England" on a building in London must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why they are there on a name.

**Her Little Boy Was Very Ill With Summer Complaint**

Mrs. Ray Fisher, Leiber, Sask., writes:—"For over a month, last summer, my little boy was suffering from summer complaint. He got so weak and there began to be traces of blood in his stool, and anything he ate would not become so weak he could not stand up. A neighbor recommended Dr. Fowler's Wild Cherry Syrup."

"I discussed it in a dinner party, and a doctor was sent for a bottle, and he said it was more beneficial than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was the same happy, healthy boy he was before he was ill."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. O. 1500

### Wheat Grading High

Quality Year In Wheat Production In Saskatchewan

This year is a quality year in wheat production in Saskatchewan. Seven cars of No. 1 hard wheat have already been received by the flour mills at Saskatoon. In each of the years, 1927 and 1928, there was just one car of No. 1 hard wheat produced in western Canada.

The wheat graded by the Dominion grain inspector at Saskatoon, up to the present time shows a very high proportion of the high grades, as follows:

No. 1 hard, 6 per cent; No. 1 northern, 51 per cent; No. 2, 30 per cent; No. 3, 4 per cent.

A part of the No. 2 is carmel wheat to which the No. 1 grade is not given.

At the Moose Jaw inspection point 50 per cent of the wheat is No. 1, 35 per cent No. 2, and the balance mostly No. 3. A. McPherson, of the Dominion seed branch, reports.

This year northern Saskatchewan is producing wheat of equal quality to that grown in the southern part of the province. The reason for this is unusual as excess moisture during the growing season in most years makes the northern wheat starchy. The Moose Jaw line is producing a high percentage of No. 1 hard, Houghton and Elrose being outstanding shipping points.

### Interested In Peace Garden

Financial Support Promoted By Industrial Groups In U.S. and Canada

Interest is developing in a proposal of horticulturists of Canada and the United States that an international Peace Garden be established at some point along the boundary between the two countries. The idea has brought expressions of approval from the Governor-General of Canada, Hon. William Phillips, the United States ambassador to the Dominion, as well as from several Canadian politicians of cabinet rank. The heads of many large industrial concerns on both sides of the boundary have promised financial support, and a considerable sum is in view. A nucleus of endorsement for the garden.

Certain it is that a garden of the sort proposed would be a beautiful and fragrant memorial to the well more than a century of peace between Canada and her neighbor, and also an impressive pledge of good-will. Its spiritual value at all times would depend upon the degree to which it was a symbol of cordial feelings actually entertained by the peoples of the two countries towards one another and as carried into practice by them.—Regina Daily Post.

**Roumanian Scientist Designs "Space Rocket"**

Hopes To Carry Mail To America In Thirty Minutes

A "space rocket," designed to shoot upward for 32 miles, and it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Roumanian scientist, designed the rocket. It will be built under the supervision of the U. S. A. Film Company. Its object, for the first flight, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in it to the end.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

### Winipeg Has List

Aviation Club Has Record Of Over Thousand Hours In Air

The rapid growth of air-mindedness in Canada is indicated by the fact that a number of clubs in Canada have flown more than 10,000 hours during the first eight and a half months of the year.

The Winnipeg club heads the list with well over 1,600 hours in the air; Toronto comes second with about 700 hours, and Ottawa third, with just over 900 hours.

One hundred and ninety-two new private, and 57 commercial pilots are graduated from the ranks of the students in the clubs. In 1928 the figures at the end of the year showed 111 private pilots and 28 commercial.

This year there are 22 clubs in actual operation as against 15 last year.

Old Dobbin had one good point. Nobody brought out a new model about the time you got him paid for.

A Reliable Antiseptic—Minard's Liniment.

## From Youth To Old Age

THERE are three trying periods in a woman's life: when the girl matures to womanhood; when a woman gives birth to her first child; when a woman reaches middle age. At these critical times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor. Countless thousands testify to its worth.

## Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., Lynn, Mass., U.S.A. and Cobequid, Ontario, Canada

### Artificial Silk From Acetic Acid

Combined With Cellulose Will Make Fine Fabric Is Predicted

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. B. Keyes, of the University of Illinois. The sour substance with which chemistry's magnetic touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. He told of a newly-developed process at Illinois for making it, developed in co-operation with E. P. King and Sherbrook Swaine, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

Externally Or Internally, It Is Good.—When applied externally by rubbings, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally it will relieve the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

### Makes Ninety Miles An Hour

"Pure British"

The Prince of Wales made his first flight as owner of an airplane, to see his father at Sandringham. It is a 3. H. Gypsy Moth, price only \$3,800. The Prince would not buy anything not "pure British." The little Moth makes 90 miles an hour, carries a bright red and blue and carries a silver plate marked "H.R.H. The Prince of Wales." The little machine with aluminum nose is unarmored in scarlet leather which can be inflated to avoid bumps.

### Student Aviator Gets Thrill

Fell Out Of Plane But Fortunately Had Parachute

Arthur Center, automobile dealer and student aviator, of Springfield, Mass., experienced an unexpected thrill when he fell out of his plane while flying 1,800 feet over Springfield airport.

Center, who was flying without a safety belt, but who had a parachute, pulled the cord of his parachute and made a landing under the plane, fell in an open field and was demolished.

School Teacher: "If a farmer has 14,600 pecks of potatoes, and he sells them for 20 cents a peck, what will he get?"

Small Boy: "A set of golf clubs, a radio and a town car."

Massage the aching parts with Minard's Soothing relief ointment.

**MINARD'S LINIMENT**  
"KING OF PAIN"

### Reconstructing a Limer

Timber From Many Countries Used On Palatial Steamer

Timber of many forests in many countries has been used for reconstruction and redecoration during the seven weeks' overhaul of the liner "Majestic," which recently left Southampton for New York, on her one hundredth west-bound crossing. The varieties of wood included oak, mahogany, teak, beech, ash, satinwood, walnut, Oregon yellow and pitch pine, deal. Forty-four tons of pitch pine was used in wiring electric bells and electric lights in cabins of tourist third class accommodation.

**Women Are Excluded**

By the traditional rule of a woman, no woman has ever entered the gigantic Krupp plant except the former Kaiserin. The regulation was laid down by Frau Margarete Krupp, for years chief director, and continued in force by her daughter, the present owner, Frau Bertha Krupp von Bohlen and Halbach.

Five hundred years before the birth of Christ, Hippocrates, the Greek, wrote a book on medical science which is still studied by students in America and Europe.

## Washington Conference Only Preliminary To General Naval Parley

London.—Official circles here understood that Premier Ramsay MacDonald had practically completed all arrangements for invitations to Japan, France and Italy for a naval conference based on the agreement reached with the United States before he sailed for America.

Definite information of the despatch of the invitation was not available, but it was reliably reported they might go forward tomorrow. The countries to whom they are addressed have already been informed of the progress of the Anglo-American negotiations and Mr. MacDonald had repeatedly said that any agreement reached with Washington was only preliminary to a general conference.

Premier MacDonald in a message to the National executive of the Labor party prior to his departure for the United States, referred to the forthcoming disarmament conference at Washington and said that any agreement achieved would be only preliminary to a larger agreement which must be reached with the other naval powers.

"We are not trying to present any other nation or nations with a fait accompli, which they must take or leave," said Mr. MacDonald's message which will be read at the opening of the annual Labor conference.

In the message the Prime Minister outlined the Labor party program. He promised that on his return, "you will see a development in the forward movement on the home front which will, I hope, be no less satisfactory than what has been achieved at The Hague and Geneva and in Egypt, and I hope for many accomplishments when our negotiations with America are finally completed."

The message concluded with an appeal for a little time to enable the work of the government to bear its proper fruits.

### Dates For Winter Courses

**No Tuition Fees For Farm School At Saskatchewan University**

Saskatoon.—Dates for the annual farm school and winter short courses in engineering, threshing machine, and better making, and poultry keeping have been announced by the extension department of the University of Saskatchewan.

This winter the farm school will offer a 10-day course from February 4 to 14. There are no tuition fees and lectures will be given by the regular professors. The other classes will be held for short periods between January 7 and March 7.

### Approves New Building

Regina.—Hon. W. C. Buckle, Minister of Agriculture, has given approval by the Government of a new building for Saskatchewan for a cost of \$105,000. The cost is to be shared by the Federal and Provincial Governments. It is understood work is to start immediately.

## Forke Announces Further Reduction In Entry From Non-Preferred Countries

Ottawa.—The number of farm laborers which transportation companies will be permitted to bring into Canada from non-preferred countries of Europe will for next year be further reduced by 25 per cent. The present provisions encourage emigration from the British Isles but will be continued in the case of those two island assisted passages.

Representatives of the Canadian Pacific Railway and steamships, the Canadian National, the Hudson's Bay Company, and several ocean shipping companies recently spent a day in conference with Hon. Robert Forke and officials of the Immigration Department, laying plans for next year's movement. Although the transportation companies had hoped for greater scope in bringing out farm laborers, the decision of the minister seemed to have been fairly acceptable.

A year ago in order to reduce the influx of immigrants from Central Europe the number of farm laborers which were allowed from non-preferred countries was limited to one-third the previous year's total. This resulted in 10,000 less entering Canada. While the restriction was even greater than this year, the requirement that the movement be completed by May 31 is not so far being continued. And there is also more latitude in the case of those who have fellow countrymen here willing to assist them in getting located on the land.

At the conclusion of the conference the following statement was issued by the department:

"It was agreed that British immigration will continue to receive every possible encouragement. The renewal of the assisted passage agreement for certain classes of British migrants, which expires at the end of the present calendar year, was recommended. These classes include farmers for land settlement, houseworkers, and juvenile immigrants moved under provincial government or recognized societies' auspices.

### Enthusiastic Send Off For Premier

**Huge Crowd Cheered Ramsay MacDonald At Waterloo Station**

London, England.—Prime Minister Ramsay MacDonald started on his historic mission to the United States, a parting warm handshake from United States Ambassador Charles G. Dawes to speed him on his way.

A huge workaday crowd was gathered at Waterloo Station energetically cheering "Good Old Mac" and "Old Ramsay." "I am off in the hope of being able to do something to narrow the Atlantic," Mr. MacDonald said.

Before he left London, Mr. MacDonald bade Premier Mackenzie King of Canada, thanking him for arrangements he has made and expressing the great pleasure with which he and his daughter Isabel are looking forward to their visit to Canada.

As the time neared for the train to depart, labels reached from the door of the car and nervously plucked him once or twice by the sleeve, urging him to step aboard. Her flushed face betrayed excitement, her eyes sparkled in anticipation.

Outside the railings of the station in full sight of the MacDonald train, a group of workers clambered by the tops of taxicabs and began singing "The Red Flag." But as departure time neared, the tune changed to "For He's a Jolly Good Fellow."

Finally as the train pulled out for Southampton, from where the MacDonald party left London, the "Berrigars," the entire crowd began to sing "Auld Lang Syne."

The prime minister is scheduled to arrive in New York on October 1.

### Balloon Found Unmanned

**Believed To Be Piloted By French Flyer**

Paris.—A tragedy of the air was indicated as a balloon without passengers floated to the ground near Kamanc, Yugoslavia.

The Aero Club of France was advised the balloon carried the club flag, and that blood spots were found on the torn basket. An altimeter registering 5,000 meters (about 19,000 feet) was found by peasants nearby.

It was believed the balloon was the one in which Pilot Nuger left St. Cloud, near Paris, to compete in the annual Thievilly Cup race. The place where the bag was found is 80 miles from Paris.

### Favors Canadian Flag

Nanaimo, B.C.—After debating for more than an hour, whether or not Canada has a distinct national flag of its own, the British Columbia School Trustees' Association decided that they had not, and that the proper authorities should be informed that the association favored a distinctive emblem.

### Colony For Doukhobors

**Two Hundred and Fifty Members of Sect Transferred From Jail To Colony in B.C.**

Nelson, B.C.—Some 250 Doukhobor men, women and children who have been confined to the provincial jail here, were transported by the provincial police to Porto Rico.

Porto Rico is a former Christian community lumber camp which is situated some 15 miles south of Nelson. Last Friday when these Sons of Freedom were camping on the outskirts of the city, Peter Venger offered this old camp site to the Doukhobors as a permanent habitat.

Starting early in the morning trucks and buses carried loads of prisoners from the jail to Porto Rico until 4 p.m., when all the Doukhobors had been safely landed. Each was in addition to the prisoners, carried a couple of deputies to preserve order if necessary. This measure was not necessary.

When all had arrived at the camp it was noticeable that many of the Doukhobors directly started to pick out living quarters from among the camp buildings.

The majority of the buildings at the camp are windowless and doorless, and the more industrious of the Doukhobors began to repair their future homes; to protect them against the cold nights that are setting in.

### Discuss Coal Prices

**English Mine Owners Consider Question For Canadian Trade Question**

London, Eng.—A dozen large coal mine operators from various parts of the country met at Mr. J. H. Thomas, of the treasury, to discuss the question of prices of coal for the Canadian trade. The minister for employment was not officially representing the mining association of Great Britain, but it was noticed that Evan Williams, chairman of the association and W. Lee, its secretary, were among those present. No statement was issued immediately.

### Ban Religious Holidays

**Soviets Disbance With All Religious Holidays, Including Sundays**

Moscow.—All religious holidays, including Sundays, are abolished under the new 21 hour system of labor introduced throughout the Soviet Union. Workers are given one day of rest every five days.

The only holidays not abolished are October 25, anniversary of the October revolution; January 9, anniversary of Lenin's death, and May 1st and 2nd, international days of labor celebrations.

### Financial Aid For Zeppelin

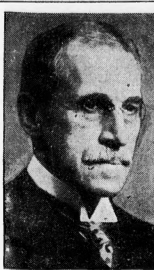

Berlin.—The Aero Arctic Association announced that financial backing has been obtained for the Arctic expedition of the Graf Zeppelin next spring. Dr. Hugo Eckener, commander of the dirigible, will have 45 persons with him on flight.

### Edison's Pupil Visits Canada

Walter Huston, Seattle boy who won the special prize donated by Robert Edison, for research and inventive potentialities, was a visitor to Canada recently, when he took Canadian Pacific coast steamship "Princess Marguerite" in a round trip from his home city to Victoria and Vancouver.

Huston who is likely to become a second Edison, will devote his life to scientific research, he says, following the example of his famous friend and mentor.

### CHAIRMAN OF ROYAL COMMISSION

Philip D. Ross, proprietor of the Ottawa Citizen, has been appointed chairman of the royal commission, announced by Premier Ferguson, which will study the welfare needs of the province.

### Will Remain In Canada

**No Truth In Rumor That Sir Henry Thornton Was Leaving**

Ottawa.—Sir Henry Thornton will remain in Canada as president of the Canadian National Railways. Any doubt on this point was settled by Premier Mackenzie King, following a recent meeting of the cabinet.

In the absence of Hon. C. A. Dunning, minister of railways, who is in the West, the Prime Minister was unable to say whether or not a renewal of Sir Henry Thornton's contract with the government had been signed.

There was no question, however, about Sir Henry remaining in Canada, the prime minister said.

Recently there have been rumors that the president of the Canadian National might go to England.

### Convicted Of Manslaughter

Mrs. Pantages, Wife Of Theatrical Manager, Found Guilty By Jury Los Angeles.—Mrs. Lois Pantages, wife of the theatrical manager, was convicted of manslaughter by a jury which heard her trial on a charge of second degree murder.

The jury of five women and seven men made no recommendation for leniency. The sentence for manslaughter is fixed by California law at from one to 10 years in the penitentiary. Three women jurors wept as the verdict was read.

Mrs. Pantages was charged following the death of a Japanese gardener, killed when their automobiles collided last June.

### Adjourns Tent Session

Geneva.—The assembly of the League of Nations on September 25 adjourned its tenth annual session, which delegates from more than fifty nations hailed as the most constructive and progressive during the ten years of existence of the league.

### Prince Appoints Air Pilot

London.—E. H. Fielden, of the air force officers' reserve corps, has been chosen personal air pilot to His Royal Highness, the Prince of Wales. In his new post, Fielden will fly the "plane owned by the Prince."

This is the first time a member of the royal family has had an air pilot attached to his establishment.

### H.B. Official To Retire

Winnipeg.—H. F. Homan, Hudson's Bay Company land commissioner, is to retire, after 35 years in the company's service. For more than a quarter century he has been associated with the company, and he has been land commissioner since 1920.

### Manitoba Has Large Surplus

Winnipeg.—A surplus of \$2,065,062 for the fiscal year ended April 30, 1929, was announced by the provincial government through Hon. W. A. Major, minister of finance. In the absence of Premier Bracken, who holds the portfolio of provincial treasurer.

## Reparation Has Been Asked For Damage Sustained By Shawnee

### Issue Interesting Report

**Grain Commissioners Publish Baking Tests Of 1929 Flour**

Winnipeg.—Low weight per bushel, lower flour yield, higher protein content; lower water absorption of the flour and excellent baking quality are features of a preliminary report on the milling and baking characteristics of western Canada's 1929 wheat crop, issued by Dr. F. J. Birchard, chief chemist to the Board of Grain Commissioners for Canada, and his assistant, T. R. Allen.

Milling and baking tests conducted at the Dominion Grain Research Laboratory, in Winnipeg, indicate that, on the whole, the milling yield is inferior, but the baking quality, grade for grade, is fully equal to that reported to that of last year's states Dr. Birchard, in the report.

The effect of frost and immaturity is not a serious consideration as was the case last year; practically all the wheat is sound and mature, but each grade contains an increasing number of undeveloped kernels and consequently the weight per measured bushel would appear to be the chief factor in determining the grade.

### No Canadian Race

**But Bureau Of Statistics Accepts "Nationality-Canadian"**

Ottawa.—There is a Canadian nationality but no Canadian race, and any government form filled with nationality as "Canadian" is accepted, it was learned at the Dominion Bureau of Statistics.

Complaint was made in Toronto of a father who three times entered his child as Canadian and the form was returned, Ottawa being blamed. It is pointed out here that the vital statistics forms are made to the provincial authorities and not to Ottawa.

If the form was returned because the new baby was termed Canadian, it must have been returned by the provincial authorities. The Bureau of Statistics accepts "Nationality-Canadian" but also accepts racial origin, which has nothing to do with nationality.

### New Zealand Showing

**More British Pictures**

Quota Has Been Set By Regulations Of Government

Wellington, New Zealand.—A greater proportion of British moving pictures will be shown in New Zealand in the future, according to new government regulations. From October 1, exhibitors will be required to screen a fixed quota of British films.

The government says it has been unable to supply of both the talking and silent films from British studios will be available during the coming year.

### Retiring On Pension

Edmonton.—Supt. James Ritchie of the Royal Canadian Mounted Police, at Edmonton, has announced his resignation to take effect shortly. He has been in charge of the Northern Alberta district for the last six years. He has been in the Mounted Police for the last 25 years and is now retiring on pension.

### Amery Confident Russian Relations Will Not Affect Canadian Grain Trade

Ottawa.—Canada's wheat trade would not be imperilled by a resumption of trade relations with Russia by the Labor Government in Great Britain for some years at least, Right Hon. L. C. M. Amery, secretary of state for the dominions, said in the House of Commons today.

In the present disorganized condition of Russia under the Bolshevik regime, it is highly improbable, Mr. Amery said, "that there will be surplus wheat to export for some years to come. The Russian farmer probably only raising enough for his own needs. It is hardly likely that Russia would not constitute a competing factor in the Russian market for the dominions."

The possibility of a resumption of trade relations between Great Britain and Russia, Mr. Amery could not say.

## Millions In Waste

Ford Plants Blot Everything From Diamonds To Blotting Paper

Some most unusual items find their way into the tremendous quantities of scrap heaps at the plants of the Ford Motor Company.

Among these items are a carload of blotting paper each week, a sale of scrap iron and a huge amount of coke. Sale of scrap of all kinds last year netted the company \$2,573,876.00. This figure represents only scrap that was sold; vast quantities in addition were salvaged and converted into use by the company.

Next to the sale of coke, the largest single item in revenue-producing by-products is scrap metal. Twenty-eight freight cars on an average pull out of the plants each day loaded with metal shavings and trimmings about 100 tons. More than half of this represents trimmings from machine shops and is sold to outside mills for conversion into new metal.

The rest of the metal scrap is of the type wholly entirely in open-hearth furnaces and a considerable volume of such waste never leaves the Ford plant, being converted there for further use.

The blotting paper is salvaged after use as a cushion between plates of glass. It loses none of its value as blotting paper and is re-sold.

Silver is recovered from ralls used in the photographic department; diamonds are salvaged from hand-cutting tools, and not the least are the left-overs from the wood upholstery. This latter waste is sold to an optical firm to be made into portholes for eyeglasses.

## Established Penny Post

Sir Ronald Hill Recommended Low Rate In 1837

A little over fifty years ago Sir Ronald was presented with the freedom of the City of London as a token acknowledgment of the great service he rendered in the establishment of a penny post. It was in 1837 that Hill published his famous pamphlet recommending that within the United Kingdom the rate for letters not exceeding half an ounce in weight should be one penny. The use of postage-stamps was mentioned almost incidentally, for Hill wrote: "Perhaps the difficulties might be obviated by using a bit of paper just large enough to bear the stamp, and covered at the back with a glutinous wash, which, by applying moisture, might be attached to the back of the letter." The Act empowering the penny post received the Royal Assent in 1839.

## Marquis Likes Harvesting

Her Of Duke Of Montrose Spends Summers On Canadian Farm

A scion of a titled house with a liking for work is the Marquis of Graham, eldest son and heir of the Duke of Montrose. While other young men are sun-bathing at Deauville and on the Lido, he comes to Canada to act as a harvester. This is the second year in succession in which for several weeks Lord Graham has elected to put in work on a Canadian farm. He is a nice-looking, fresh-faced man of 22, and good at most games.

Pat. (to tourist): "We have great athletes in Ireland."

Tourist: "Why, our champion ran 18 miles and then jumped a nine-bar gate."

Pat: "Oh, that's nothing when you think of the run he had at it."

"Dae ye ken that your hens come over into ma garden?"

"I thought they must be daein' that."

"Whit make ye think me?"

"Because they never come back."

The average weight of a head of hair is from five to twelve ounces.

Wife: "Please come and help. I can't get the trunk closed alone."—Lustige Sache, Leipzig.

W. N. U. 1805

## Marking Pigs For Identification

The Use Of Metal Tags Is The Most Common Practice

Where hogs are bred in large herds it is necessary to follow some sort of marking for identification. One method which is followed by some is that of nicking the ears. Pigs, in each litter being marked on a similar part of their ears. By means of various combinations of marks quite a large number of different litters are marked, and subsequently identified. This method is faulty in that the ears may be torn and the marks destroyed. It has no other weakness in that it does not serve to identify the individual pig within the litter. The use of metal tags is a general practice on some hog farms. These are stamped with combinations of letters or figures, and as each tag has a different combination a ready means of identification is assured. The most satisfactory type is that which is self-clenching, and when inserted in the ear remains there permanently unless torn out. When this happens which is but rarely, a duplicate may be inserted. In order to avoid confusion the tag should be inserted in the ear at or before weaning time.

The Dominion Animal Husbandman who has a wide experience in marking hogs for identification, calls attention in his report for 1928, published by the Department of Agriculture, at Ottawa, to the use of the tattoo in marking hogs. It is officially recognized by the National Pig Breeders' Association of Great Britain. This method of marking is unsatisfactory in that it is difficult to apply and the tattooing process is painful. The method with the object of determining its value as a means of identifying swine.

## Suggested Economic Parley

Other Dominion Asked Some Time Ago To Meet At Ottawa

Premier Mackenzie King has revealed that Canada some time ago suggested to the other Governments of the British Empire that an economic conference be held at Ottawa this year. It was not found possible, however, to arrange for such a meeting at the conference. In making these statements the Prime Minister pointed out that Canada would welcome an economic conference in the Dominion. "It is exactly what we would wish," said Mr. King. On the other hand, it was the desire of the Dominion to call the convenience of all parts of the Empire, and if the general feeling existed that the conference should be in London, England, Canada would be prepared to acquiesce. The Prime Minister said that there would probably be an economic conference either here or elsewhere, next year.

## Work Horses Shipped East

Saskatchewan Horses Are Shipped To Lindsay, Ontario

Under the auspices of the Saskatchewan Live Stock Pool, and the Provincial Government, an inaugural shipment of carefully selected work horses was made from Maple Creek, Manitoba, to the order received by W. Waldron, Manitoba Commissioner, from the F. J. Carey Lumber Company, Lindsay, Ontario. These horses are required for bush work and are young, upstanding, heavy weighted teams, and were inspected by Dr. M. P. McClellan, Veterinary Officer of the Provincial Department of Agriculture. A cooperative horse marketing organization for Saskatchewan has been a long felt want and the need has now been supplied by the formation of a horse marketing division of the Saskatchewan Live Stock Pool, supported by the Provincial and Dominion Departments of Agriculture.

## All The Same To Him

His wife had come to visit her mother, and had telephoned that she would not be returning until the morning.

"When she got home, she said to me: 'You must go to bed and something to eat last night, didn't you, dear?'"

"Oh, yes," he replied cheerily. "I had the steak that was in the pantry and fried it with some onions that I found in the cellar."

"Onions?" she gasped. "Darling, you've eaten my flower bulbs!"

The Hubbardshaker. Yes, sir, those rocks will give perfect satisfaction. I've worn them myself for the last two months."

The Customer—Have you a pair like them that you haven't worn so long?

"Hans, did you hear the step-ladder fall?"

"Yes, mummy."

"I hope daddy hasn't fallen."

"Not yet—he is still hanging by his waistcoat to the picture hook."

## Keeps Lonely Vigil

Secretary Of Ancient Cutlers' Company Only Member At Yearly Meeting

Every year on August Bank Holiday (the first Monday in August) the secretary of the Ancient Cutlers' Company, in Hallamshire, keeps a lonely vigil at Cutlers' Hall, where he arranges a meeting for members of the company who he knows will never come, and never have come on this particular date.

An old Act of Parliament, passed as part of a charter of the Cutlers' Company, says that a meeting of the company shall be held on the first Monday in August every year, between the hour of 1 p.m. and 3 p.m., to elect 24 assistants to the company.

In these days no meeting is held, but to comply with the statutory requirements, provision has to be made for a gathering at Cutlers' Hall. The presence of at least 40 members would be necessary if a meeting took place, for this number is needed to form a quorum. If the act of Parliament were to be altered to avoid the necessity of the secretary attending, it would cost about \$4,000 in legal fees and other charges, and from one o'clock to three o'clock, the secretary sits and waits the errant members who are probably enjoying their holidays.

## Menace To Garden Corn

Worm Destroys Kernels When Cob Near Cooking Stage

Since the European corn-borer has been doing damage to corn fields in Canada it has often been confused with another worm, particularly in garden corn, says a Federal Department of Agriculture bulletin. The corn-worm, unlike the corn-borer, works in the ear, eating out the kernels of the cob when at the cooking stage. The caterpillar of the corn worm when mature is from 1 1/2 to 2 1/2 inches in length. It varies in color from light green to dark brown with rather indistinct stripes on the back and a wider and inconspicuous pale colored band along the side. Its description is given in Bulletin No. 112 of the Department of Agriculture, at Ottawa, by Arthur Gibson, the Dominion Entomologist, and C. R. Twinn, an officer of the Entomological Branch. It attacks the ears of garden corn, feeding on the kernels, particularly those near the tassel. Some years the insect is quite abundant, and according to these authorities, at such times it also may be found boring in the fruit of the tomato.

## A Luxury Already

What with airplanes attaining a speed of 220 miles an hour and automobiles whizzing along at sixty and seventy, motorboats skimming the waves like a flash of light, how long it is going to be before a quiet stroll is going to be a luxury?

There is no room for trouble in an air castle.

## Amalgamated Civil Servants

Here is Fred Knowles, secretary of the Amalgamated Civil Servants of Canada. He is one of the organizers of the body and obtained leave of absence from his job as letter carrier in Vancouver to take over his present job in Ottawa.

## A One-Man Newspaper

"Star" Of "The Star" at White Horse, Yukon, Is Kept Busy

Mussolini may hold seven or eight cabinet offices in Italy, but he has more than a rival in J. D. Skinner, of White Horse, Yukon Territory. For he is porter, reporter, advertising department, composing room, mailing room, publisher and financier of the White Horse Star. He thinks, he says, that his is the only one-man newspaper published in Canada.

There may be others there and elsewhere, but at a glance at the issue of July 19, shows a publication free from typographical errors, well edited, and illustrated with various factors in the news, and not the least of which is a photograph of the publisher himself.

The "star" of the Star, as revealed by his photograph, shows no signs of the wear and tear which might be expected. Yet, in addition to general news, his July 19 edition contains seven or eight columns of "personal" and all country editors know how much work it takes to compile these. All the overworked who may hear of the gallant Mr. Skinner will wish him health and success and look forward to an early day when from the list he gives of his duties, he may at least stifle off the one of sweeping out the Star office.

## Lightening The Load

If Canada continues as in the past, fiscal year, to devote \$100,000,000 to interest and debt redemption, this country will be free from debt in twenty-five years. Every year, the debt weight of interest liabilities, having decreased \$22,000,000 since 1921, when the maximum was \$130,531,520 for that year.

The secret of success lies in the man and not in the stuff he works on.

## Where the Clans Gathered

Layout of the grounds of the Banff Springs Hotel, where the Highland Gathering and Scottish Festival and the Dominion Irish and Field Championships were staged recently. Centre photograph shows the grounds and (1) Piper Hector McDonald, Montreal, winner of first prize for strathspey and reels, second prize for marches and winning the highest aggregate points over all the open piping events; (2) Pipe-Sergeant J. R. Cairns, of Hamilton, winner of the trophy donated by E. W. Beatty, chairman and president of the Canadian Pacific Railway, open to any piper of any pipe band officially connected with any unit of the Canadian militia; (3) Pipe-Sergeant Donald McClelland, of the Queen's Own Cameron Highlanders, Winnipeg, winner of a special prize donated by E. W. Beatty, for the best piped among the delegate pipers from the various Highland regiments of Canada; (4) Lieutenant-Governors Wil-

## Glue From Sweet Potatoes

Commercial Production For Use On Stamps To Be Undertaken

A new item looms on the horizon of personal liberty—the privilege of licking stamps that suit the individual taste.

Scientists in the bureau of chemistry and soils have discovered that a high quality starch is obtainable from sweet potatoes. From the starch they have produced dextrin of pleasant taste. They are testing its suitability as glue for stationery and stamps.

All that is left to do is to develop a method of economical commercial production. It is to be undertaken this fall, when the sweet potato crop is harvested. Unofficially, it is believed dextrin can be made from sweet potatoes as cheaply as from tapioca, the present source of most stamp and stationery glue.

If it can, and manufacturers are able to pay enough for sweet potatoes to make it worth the producers' time to market such, solution has been found for the tremendous waste that has forced many farmers to quit raising them.

It is estimated that about 20 per cent. of the country's average production of 80,000,000 bushels is culled, heretofore suitable only as feed for cattle and hogs.

This pound of sweet potatoes, says Dr. W. W. Skinner, assistant chief of the bureau's chemical and technological research, makes one pound of starch. At that rate he estimates a market for 870,000,000 pounds, or 17,000,000 bushels of sweet potato culled.

## Played Joke On Cambridge

Some Years Ago Students Faked Visit Of Sultan Of Zanzibar

The visit of the Sultan of Zanzibar to Cambridge recently recalled what was probably the greatest hoax perpetrated on any civic authorities some years ago. It was announced that His Highness would visit Cambridge, and the mayor and corporation turned out in full splendor to pay homage to their distinguished visitor. In due course the Royal party arrived, and were received at the Guildhall. It was not until after full honors had been accorded that the councilors learned that they had been entertaining a party of their own students. The undergraduates were on vacation when the Sultan really arrived.

## English Gardeners Value Toots

English gardeners are always in the market for live toots, and not infrequently as much as \$25 per hundred is paid for this insect destroyer. It is estimated that every time you buy a loaf of bread, it is the dead weight of interest liabilities, having decreased \$22,000,000 since 1921, when the maximum was \$130,531,520 for that year.

"Harry, I don't believe that you put the cat out."

"Well, if you think I'd tell a lie about a little thing like that, put her out yourself!"

## Finishing Poultry For Market

Potting Finishing Touches On Poultry Before Offering For Sale

The time would seem to be just when poultry finishing poultry can be marketed with profit. Indeed it is held by authorities that putting the finishing touches on market poultry before offering it for sale, yields the greatest proportionate return of any labour done on the poultry yard. Well finished broilers or roasters undoubtedly cost less per pound to the producer than those that are poorly dressed, and are much more desirable to the consumer.

The past methods of finishing poultry for market are described by Mr. F. C. Efford, Dominion Husbandman, in Bulletin No. 20, of the Department of Agriculture, at Ottawa.

Crate feeding, especially for cockerels, is highly recommended, but it is also claimed by Mr. Efford that it will pay to adopt this method with pullets and hens when they are to be sold in dressed condition. Crate feeding has forced many farmers to feed batteries for those who buy in chickens to finish in a large way.

In putting in a batch of chickens to be fattened it is recommended to allow them to mix a meal and then to feed sparingly for several days. This plan is necessary to avoid indigestion with birds that have been confined in small quarters after having been accustomed to free range. Twenty-four hours of fasting are recommended at this stage. After the birds have become accustomed to confined quarters by merely increasing the feed they should be fed two or three times a day all they are able to take, and after each feed the pullets and hens when they are to be sold at all times is necessary and a feed of grit several times a week is advised.

There are many ways of preparing the feed. This bulletin, obtainable from the publications branch, Department of Agriculture, at Ottawa, recommends the use of only ground grain, fed in a wet state of consistency that it may be poured into the pail or dipped out with a flat ladle. Butter-milk is recommended as the best liquid with which milk next in preparing the feed. When skim milk is used it is recommended to allow it to sour slightly and to mix one feed ahead. A little salt added to the milk will encourage the birds to eat more of the feed. Practically all of the coarser grains are suitable—corn, oats, barley, buckwheat, and wheat, etc., may be mixed in any combination, but they should be finely ground and the coarser hulls removed. If wheat has to be cleaned, instead of milk in preparing the feed from 5 to 100 per cent. of animal foods, such as best scrap or blood meal should be added to the grain mixture.

Instructions for killing and packing for market are included in the bulletin.

## Valuable For Briquettes

Newly Discovered Coal Deposits In Ontario May Be Used For This Purpose

Samples of coal taken from the area at Blacksmith Rapids, on the Abitibi River, where Ontario engineers have discovered extensive deposits, have been analyzed by the Federal Department of Mines experts, and indications are that the coal is valuable as material for briquettes or powdered coal.

Considerable treatment would be necessary before it could be of commercial value. However, the samples which the department examined were taken from seams near the surface, and it is believed a better product might be obtained at greater depth.

"Most men who reach the top of the tree are lonely." It is stated. They often sacrifice too many friends on the way up.

"What nonsense is this you have written." If this happens again, "But that is not my writing." "That is no excuse."—Hummer, Hamburg.

# Mysteries Are Wrapped Up In Strange Disappearances Of Many Deep Sea Vessels

Denmark has abandoned its hope-  
less its long search for a clue to the  
fate of the full-rigged clipper train-  
ing ship "Copenhagen" with sixty-cru-  
sels aboard, seen for the last time  
in the throes of her struggle with a  
heavy sea off a lonely island in the  
South Atlantic. During the several  
months of weary exploration that  
has intervened, not so much as a  
spar, a lifeboat or a piece of float-  
ing wreckage has rewarded the  
Danish seamen who undertook the  
quest for the missing ship. The mys-  
tery that envelops the Copenhagen  
quickly resembles that attending the  
disappearance of the United States  
clipper "Cyclus", and it has prompt-  
ed New York Sun to recall other  
tragedies of the sea that also  
remain unsolved.

In the latter part of 1925 an  
American steamer came upon the  
schooner "Mary Cornish" in mid-  
Pacific. Nothing indicated that the  
schooner had suffered from disaster  
weather or that it had been  
swept by a high sea. Bloodstains  
were found on a newspaper in the  
cabin, but no evidence of a struggle  
was neither officer nor crew  
aboard, and no boats were missing.  
What had occurred aboard the craft,  
in all probability, never be-  
known. Two years before this the  
captain of the French sailing ship  
"Emile Gallien" in the Pacific. Cap-  
tain, found a three-masted vessel  
embedded in an iceberg. The craft  
was firmly fixed in a cleft of the ice  
mass about twelve feet above the  
water's edge and, with the excep-  
tion of a broken topmast, appeared  
intact. There was no sign of life  
aboard and all the boats were in  
place. He reported the circumstance  
and the ship was tentatively iden-  
tified as one long, long missing,  
but no one was able to offer an ex-  
planation of its loss.

A French steamer fell upon a  
large junk in the China Sea, which,  
upon investigation, the master found  
was deserted. In the junk he came  
upon a cargo of silk and a consid-  
erable sum of money. The only ex-  
planation was offered by a Chinese  
member of the crew; who said that  
it was a craft belonging to a band  
of pirates who had fled in fear  
that the steamer was a dis-  
guised warship. As strange as the  
covery was reported by the captain  
of a Dutch liner plying among the  
West Indies and along the South  
American coast. He headed a tramp  
steamer destitute of life except a  
starving dog. He found evidence  
that the crew had only shortly be-  
fore abandoned the vessel. His  
theory was that when the ship had  
become becalmed they had taken to  
a small boat in the hope of towing  
the vessel, but had been swept away  
by a strong current. The steamer  
had been listed among missing ships,  
but in this case, too, only conjecture  
was left regarding the fate of its  
crew.

Not always does Old Man Sea  
leave so much of a clue to his mys-  
teries. It is because he restored  
these missing ships to human ken  
that another chapter has been writ-  
ten of their disappearance.

## A Strange Coincidence

Peter Archer, a six-year-old boy,  
of Hull, England, who was knocked  
down by a motor omnibus and seri-  
ously injured, was being taken in  
an automobile to Hull Royal Infir-  
mary when the ambulance was  
stopped for a man who had been in-  
jured at work. He proved to be the  
boy's father.

Mrs. Brown eyed the joint criti-  
cally.  
"Tell your master," she said to the  
butcher's boy, "that I shall buy my  
meat elsewhere if he doesn't correct  
the error of his weight."

"Have you ever heard of mount-  
ains that don't expect I ever  
shall."—Lasting Sachse, Leipzig.

W. N. U. 1895

## Canada's Dairy Industry

Canadians Are Eating More Butter  
Than Ever Before

Dairying is a rather flourishing  
business in Canada right now. Cana-  
dians are eating more butter than ever  
before. We are large consumers of  
this product. In 1925 we consumed  
29,311 pounds per capita in this coun-  
try as against about 18 pounds per  
capita in the United States. This is  
accounted for partly by the elimina-  
tion of oleo-margarine from our  
market, although it is sold in the  
States. Also our butter is a better  
butter and induces a liberal use.

The only real competition our  
dairymen face is in New Zealand  
butter, which is imported during the  
winter months, in small but increas-  
ing quantities. Canadian producers  
find that their storage product must  
compete against the fresh New Zea-  
land product and the competition is  
difficult. But the effect of the im-  
portations has been exaggerated.

In cheese, Canada is building up  
a commanding position throughout  
the world. This is due chiefly to the  
fact that Canadian Cheddar Cheese  
is of high quality and sells at a pre-  
mium in British markets over other  
imported cheese. This fact was re-  
ferred to in a recent article in the  
Canadian Business Review, published  
by Cockfield, Brown & Co., advertis-  
ing and merchandising experts of  
Montreal. The article was from the  
pen of Duncan Marshall, former  
minister of agriculture in Alberta,  
who is now a member of their staff.

There is a lesson in our experience  
with cheese. By improving quality,  
by grading property and by estab-  
lishing good marketing facilities we  
have put our cheese beyond the  
reach of competition. Given proper  
leadership by Dominion and provin-  
cial departments of agriculture, our  
butter producers could do the same  
thing.

The greatest danger in the dairy  
business at the present time is in-  
flation rather than outside of the indus-  
try. It lies in the fact that the de-  
mand for cows is so great that many  
men are tempted to break up their  
foundation herds when they should  
be building them up.—Financial  
Post.

## To Exterminate Insects

Electric Light Rays Are Now Used  
With Good Effect

Light rays and electricity are be-  
ing used in exterminating insect  
pests. Electric light traps, consisting  
of a lamp set directly over a pan of  
water upon which a covering of oil  
has been poured, entices the insect,  
who invariably falls into the film of  
oil and is unable to arise.

An electrified screen stable door  
has proved feasible. The screen is  
charged with high voltage static,  
deadly to pests but harmless to hu-  
mans.

Boy Friend (calling fancee):  
Hello, dear, would you like to have  
dinner with me tonight?  
She: "I'd love to."  
He: "Well, tell your mother I'll be  
over early."

The venture can be seen from a great  
height, while the city below  
will pick at objects so small that the  
human eye misses them.

## President Inspects Resort

Among the many places visited by E. W. Beatty, chairman and president of the Canadian Pacific Railway, and the directors who are now on a tour of the company's properties in the west, was the famous Nipigon hunting resort at Nipigon. Mr. Beatty is seen accepting a bouquet of Nipigon Chrysanthemums from Miss Eline Porter, daughter of the operator at Nipigon Depot, and is also shown conversing with Tom Running Deer, Indian guide attached to the camp. The president and directors spent several hours in the buffer on their way to the west.

## Held Important Military Posts

Big-Gen. Sir Gilbert Clayton, high commissioner for Irak, who is  
also after colphing following a  
polo game. Sir Gilbert was 54 years  
of age, and had held several impor-  
tant military posts.

## Rambouillet Sheep

Considered To Be The Best Breed  
For The Beginner To Raise

Although not well known in the  
province of Manitoba, the Rambouillet  
breed of sheep enjoys a wider dis-  
tribution on the North American con-  
tinent than almost any other breed.  
They possess some very desir-  
able characteristics, in that they are  
quickly developed by the farmer with  
diseases that affect sheep. They  
have an excellent quality of wool,  
the ewes make excellent mothers,  
and through a foundation of Ram-  
bouillots, a high class flock of any  
of the blackface breeds may be  
quickly developed by the farmer who  
pays careful attention to his breed-  
ing practices. There is no doubt but  
that the Rambouillet breed is the  
best for the beginner in sheep, owing  
to the fact that generations of  
breeding on the large ranges, has  
developed in this breed, a remark-  
able ability to take care of them-  
selves under any conditions. The  
sheep that are being supplied to  
Manitoba farmers by the Manitoba  
Livestock Credit Company, this fall,  
are a carefully selected lot of the  
Rambouillet breed.

## Merely An Uncle

Lord Macduff, the young son of  
Prince and Princess Arthur, of Con-  
naught, had just learned the words  
of the national anthem, and he told  
his nurse that he wanted to see "Our  
Noble King."

One day, when the king was walk-  
ing in the grounds at Baginbush with  
the Duke of Connaught, Lord Mac-  
duff was told by his nurse, "Look,  
there is the King, with Grand-  
father."  
"Oh, no," said little Lord Macduff,  
"that is not the King. That is my  
Uncle George."

The only place a woman cannot  
attain her point is on a lead pencil.

The French perfumery industry is  
valued at \$36,000,000 a year.

# Daily News Bulletin Service To Be Supplied Residents Of Far North By Edmonton Station

## West Gung Ahead

Sir Henry Thornton Takes Note Of  
Developments On Trip To  
Western Canada

"There is a silver lining to the cloud  
in the situation in the West," stated  
Sir Henry Thornton, chairman  
and president of the Canadian Na-  
tional Railways, on returning to his  
headquarters in Montreal, after a  
tour which took him throughout the  
Western Provinces and to the Pacific  
Coast.

"While it is true that the West is  
not harvesting such a voluminous  
crop as in average years, and it is  
also true that some farmers and some  
districts are hard hit, it must be  
remembered that there are dis-  
tricts and farmers in those districts  
who have harvested better crops  
than they anticipated a short time  
ago, and who are reaping the benefit  
of higher prices from their hold-  
over grain from last year, and also  
higher prices for the grain which  
they have produced in 1925."

The West has gone ahead and is  
going ahead; building up on a basis  
of sound progress, and one going  
from the East cannot fail to be im-  
pressed with the same development  
which is taking place on all sides.  
On the Pacific Coast, in particular,  
the development of trade with the  
Orient is being closely followed, and  
there is also a realization of the fact  
that Canada is sharing and will  
share to a greater degree in the  
further development of that trade.  
Sir Henry said, concluding with the  
statement that he has inspected the  
properties of the system in each of  
the provinces visited and has been  
impressed with the fine condition  
everywhere with the officers and em-  
ployees keenly on the alert to pro-  
vide the best service to its patrons.

## Russian Farm Uses

Machinery Exclusively

Soviet Grain Trust Cultivated  
350,000 Acres Of Land  
This Year

M. Kalmankov, head of the Soviet  
Grain Trust, when in New York  
recently, stated that the Grain Trust  
cultivated 350,000 acres of land this  
year. It was formed last year to or-  
ganize and operate large grain  
farms entirely by machinery. The  
Grain Farm in the Northern Cau-  
casus, has a cultivated area of 100,-  
000 acres. The sowing period of this  
farm lasted only 9 days, 650 trac-  
tors being involved. This is the  
world's largest farm using machin-  
ery exclusively. The Soviet Govern-  
ment has allotted 4,000,000 acres of  
land to the Grain Trust this year.  
Out of this total 2,250,000 acres will  
be sown next winter and spring. The  
plans for 1931 call for the cultivation  
of nearly 6,000,000 acres out of a  
total of 11,000,000 acres that the  
Grain Trust will have under its con-  
trol in that year. The Soviet Govern-  
ment uses machinery and tractor  
service, with a capital of \$25,000,000,  
which operates fleets of tractors to  
cultivate peasant land. The station-  
ing of the State Machinery and Tractor  
Service, which are expected to  
plough nearly 2,500,000 acres next  
year, will receive in payment for  
their services a part of the crop  
ploughed.

## Large Ranch Authorized

Southern Alberta Company Is Hold-  
ing 90,000 Acres In Lease

The days of vast ranches have not  
altogether passed from the prairies.  
The Canada Gazette recently autho-  
rized the Pigeon Ranching Company,  
which operates south of Medicine  
Hat, in Southern Alberta, to hold  
99,081 acres in lease in spite of the  
official regulations which limit hold-  
ings to 25,000 acres. The Pigeon  
Ranching Company owns 3,000 ac-  
res, 100 head of saddle and work  
horses, had 50 head of pure-bred  
Hereford and Shorthorn bulls.

## Go To Quebec University

Dr. L. A. Munro, assistant pro-  
fessor of chemistry at Manitoba  
Agricultural College for the past  
four years, has severed his connec-  
tion there, and leaves for Kingston,  
Ont., where he has accepted a position  
as assistant professor of chem-  
istry at Queen's University. Dr.  
Munro took his Bachelor's and Master's  
in Arts at Dalhousie, and his  
Ph.D. from McGill, and joins Queens  
with the best of academic and practical  
training.

Some pounds weigh as much as  
80 pounds.

## Residents of Alkavik and other

points inside and outside the Arctic  
circle in the far north are to be given  
a daily news bulletin through the  
action of Hon. Charles Stewart, min-  
ister of the interior, who has secured  
the co-operation of the Royal Canadian  
Corps of Signals has inaugurated a  
wireless news service which will  
do much to improve the isolation of  
those pioneer men and women—  
traders, ranchers, trappers, prospec-  
tors, missionaries, doctors, teachers  
and members of the Royal Canadian  
Mounted Police who are carrying  
civilization into the far north.

For the past few years the residents  
of the Mackenzie District have  
had the benefit of the wireless ser-  
vice for telegraphic purposes. Station-  
ed at Fort Smith, Resolution and  
Simpson, in the valley, and Alkavik  
and Herschel on the Arctic coast,  
the men have been in touch with the  
R.C.S.C. station at Edmonton,  
but only commercial and urgent  
private messages have been handled.  
However, Mr. Stewart felt that  
something more could be done with  
the equipment, and he has now, in  
co-operation with the department of  
national defense, made arrange-  
ments whereby every day one of the  
officers of the Department of the In-  
terior, at Edmonton, prepares a 500-  
word bulletin of news of special in-  
terest to northern residents, to be  
broadcast to the receiving stations  
of the north.

The bulletins thus received are  
posted at the local offices of the  
North West Territories and Yukon  
branch, and at all police posts where  
they are obtainable, and where they  
can be read without charge by the  
residents of the various settlements.

The work has been placed in the  
hands of assistant commissioner of  
Dominion lands, R. B. Matheson, at  
Edmonton, and the first 500-word  
bulletin has been sent out. The  
news bulletin will be continued with-  
out interruption as far as possible,  
and according to northern news in  
the city will prove of inestimable  
value to people living in the out-  
lying sections who will thus be kept  
in touch with world events and  
Canadian happenings of particular  
interest to them.

## Describing a Canadian

Immigration Act Leaves No Room  
For Argument

From time to time the question is  
asked: "What is a Canadian?" An  
agitation for agitation and yavon  
in the census defining Canadians and  
it is likely this will be done in the  
next census two years hence.

As a matter of fact a Canadian is  
clearly described in the Immigration  
Act as follows:  
"(1) A person born in Canada who  
has not become an alien; (2) a British  
subject who has Canadian  
domile; or (3) a person naturalized  
under the laws of Canada, who  
has not subsequently become an  
alien or lost Canadian domile."  
This would appear to meet the  
case adequately.

## Investigate Movie Industry

Professor Kenneth W. Taylor, of  
the economics department of Mc-  
Master University, has been ap-  
pointed by Hon. Peter Heenan, minister  
of labor, to assist in the preliminary  
inquiry under the Dominion Com-  
bines Investigation Act, into the al-  
leged combine in the motion picture  
industry in Canada. It was announced  
by the Department of Labor.

Whether an individual who owns  
a piece of property also owns the  
air above it, and whether he may  
sell or lease the air, is a disputed  
legal matter.

Sugar is found in the sap of nearly  
200 plants and trees.

"You are lucky in love, Mr. Du  
point."  
"Sincerely—I am still a back  
slor."—Moustique, Charleroi.

## To Assist Farmers

Saskatchewan Farmers In Dried Out  
Areas May Import Fodder Free Of  
Transportation Costs

Farmers in the drought-affected  
areas of Saskatchewan, forced by  
circumstances to import fodder for  
their live stock, will be able to do so  
free of all transportation costs,  
according to an agreement between  
the Government of Saskatchewan on the  
one hand, and the two railway  
companies on the other. Freight  
charges on fodder supplies into, and  
on buying outfits from, the dried out  
districts will be borne jointly by the  
government and the railway com-  
panies. Under the arrangement, the  
provincial government undertakes to  
pay the freight charges which the  
railway companies undertake to re-  
duce 50 per cent, according to  
Frank W. Thompson, chairman of the  
Canadian Freight Association.

## New Varieties Of Rust-Resisting Wheat

Rust Production Not Yet Sufficient  
For Seed Distribution

Two or three varieties of wheat  
which are resistant to rust have been  
developed by the Department of Agri-  
culture. It was stated by Dr. J. H.  
Grisdale, Deputy Minister of the de-  
partment, "Our experiments of the  
year confirm the earlier prospects,"  
said Dr. Grisdale. "No names have  
yet been given the new varieties,  
and it will be two or three years  
before they can be produced in suf-  
ficient quantities for seed distribu-  
tion, but we feel confident that we  
have the kind now that will resist  
the known varieties of rust."

## NOVEL NECKLINE

A printed silk crepe in semi-sports  
type so suitable for in-between sea-  
sons, to freshen up summer  
wardrobe. It is in flattering aspic-  
tuous with brown trim. The neckline  
is especially becoming with white  
collar in deep open V-shape with jab-  
bet full attached below fast closing.  
The hip yoke of skirt turns up at  
front. Inverted plait at centre pro-  
vides fullness to skirt hem in motion.  
Sleeves have applied trimming  
straps. Style No. 627 comes in sizes  
16 and 20 years, 36, 38, 40 and  
42 inches bust. In the medium size,  
2 1/2 yards of 36-inch material with  
3/4 yard of 35-inch contrast is suf-  
ficient. Plain silk crepe in red  
is youthful. Rusty beige silk crepe  
Riverdale georgette crepe, wood-  
land crepe de chine, purple canton  
crepe and wool jersey in almond  
green are ideal combinations. Pat-  
tern in price 25 cents in stamps or coin  
(coin is preferred). Wrap coin care-  
fully.

**WORLD HAPPENINGS BRIEFLY TOLD**

Great Britain in 1923 had the lowest infant death-rate ever recorded. Out of every 1,000 children who live to be one year old, only 85 died.

The population of Saskatoon is nearing the 50,000 mark, according to 1923 issue of Henderson's directory. It is now estimated by the publishers that this city has 47,553 residents.

The Aero Arctic Association has announced that financial backing has been obtained for the Arctic expedition of the Graf Zeppelin next spring. Dr. Hugo Scholer, commander of the dirigible, will have 45 persons with him on the flight.

The promotion of Charles Clifton Perry from the post of Indian agent at Vancouver to that of assistant Indian commissioner for British Columbia, at Victoria, has been announced by the civil service commission.

Some of the first issue of Danish cancer stamps have been sent in London. These stamps, issued by Denmark to benefit the Danish cancer fund, are in three colors, red, green and blue, in three denominations. All bear the Mercury wing design.

It's just as easy to get wrong numbers at sea now as on land. Telephone booths and other conveniences have been built on the steamship Berengaria for regular land communication while the ship is between England and other countries.

A reward of \$1,000 has been offered by the provincial government for information leading to the arrest and conviction of person or persons in the Doukhovnik district responsible for the burning of schools throughout the area. This announcement was made by M. A. MacPherson, attorney-general.

**The Newspaper Guide**

Advertisements are to Shoppers What Time-Table Is to Traveller

The newspaper that carries a good line of advertisements is to the shopper what the time-table is to the traveller and the published guide to the tourist. Busy people start to study these advertisements in the home or in the office, and before they start shopping they know where they are going. . . . In fact, business places are just as interested to all tourists, and the non-advertiser puts himself outside the pale so far as strangers are concerned.

**Edmonton Building Permits**

Building permits in Edmonton topped the \$4,000,000 mark this year, up to the end of August, being \$4,188,290 or more than a million above the similar eight-month period of last year.

**Extending Radio in Arctic**

Russia is rapidly restoring its Arctic possessions. The radio and meteorological station at Franz Joseph Land already is functioning, and another is being constructed on Wrangel Island.

**A Bible from the Russian Imperial Palace**

of Tsarskoye Selo, its cover encrusted with diamonds and emeralds, was recently offered for sale in England.

W. N. U. 1805

**Germany Planning World 'Plane Lines'**

Company Aims For Regular Flying Boat Service Over Atlantic in Two Years

A gigantic network of air lines which will cover the entire world is being planned by Luftthansa, Germany's most important air company. The plans are being worked out by Otto Merkel, who has given up his post as head of Luftthansa to devote himself to founding an international company, which promises within two years to open regular air lines between Europe and the United States.

Working jointly with the Hamburg-American steamship line, preliminaries have been completed. The details of the new company are still somewhat uncertain, but the approximate direction of developments has been mapped out.

"Not only is the world's interest concentrated in air travel, but in all countries the best technical experts are working out the details," said Mr. Merkel. "The experimental stage is behind us and the goal is clear. We have five 'planes' now, especially in America, excellent motors, and everywhere responsible pilots and dependable instruments which will result in an even higher standard soon."

**Device Registers Accidents**

New Invention To Help Catch Hit-and-Run Driver

A device to catch "hit-and-run" drivers of automobiles has been made by a Berlin inventor, named Rudolf Hofmann. The mechanism is described as "an automatic traffic protector."

It is adjusted under the chassis of an automobile and at the instant of any impact automatically raises a white plate with a warning light above the car's license plate. It also registers the automobile's speed.

**Winnipeg Newspaper Union**

**PARIS COTTON FROCK**

It is quite possible to appear smart, dainty and comfortable this season, because Paris derives the sheer printed cottons are the newest choice for summery wear. Style No. 562 is strikingly effective in printed cotton. It is in flattering capsule tones which enhance the charm of the sun-tan complexion. The applied yoke of cord which looks like modern influence, is in plain voile in blending tone which appears again in circular inset of skirt. The neckline is given a swished effect in circular inset of skirt. It is a fetching dress for town or resort. It comes in sizes 16, 18 and 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Printed ralph silk, crepe de chine, and georgette are appropriate. Pattern price 25 cents in straps on coin (coin is preferred). Wrap coin carefully.

**World Famous Artists On Canadian Radio**

HAROLD BAUER

FLORENCE AUSTRAL

Florence Austral, the world's greatest dramatic soprano and Harold Bauer, one of the outstanding pianists of all time, two of the world's famous artists will be heard on the air this season during the Imperial Hour of Fine Music, to be broadcast beginning on October 6th, from 8 to 9 o'clock Sunday evening. Miss Austral opens the series on Sunday evening, October 6th and Mr. Bauer will be heard on October 20th.

Announcement of a series of concerts by world famous artists on the air will be heard on the air yesterday by F. J. Wolfe, Director of Imperial Oil, Limited. The series will begin on October 6th and will continue for twenty-six weeks. It will be broadcast through stations at Montreal, Ottawa, Toronto, London, Vancouver, Winnipeg, Saskatoon, Regina and Red Deer and, with the completion of hook-up facilities at the end of the year, in Vancouver.

Among the universally known artists who have been engaged for the series are Florence Austral, the world's greatest dramatic soprano; Harold Bauer, one of the outstanding pianists; Richard Crooks, the American tenor who, though only twenty-eight years of age has scored notable triumphs in Europe and America; Lea Labrousse, who is said to be the greatest of all women violinists; Lucila Mahou, one of the most famous coloratura sopranos; Josef Lhevinne, the great Russian pianist; Richard Bonelli, leading baritone of the Chicago Opera; The Kedroff Quartet, formerly of the Imperial Palace at Petrograd, and other artists.

The series will consist principally of symphony concerts at most of

which one or more of these famous artists will assist. A great symphony orchestra of more than fifty players has been engaged and will be under the direction of Reginald Stewart, who has lately returned from a concert tour in Europe, and who has been engaged as a guest conductor for the London Symphony Orchestra in April next. The concerts will originate in Toronto and will be offered from 10 to 11 o'clock Eastern Standard Time for twenty-six consecutive Sunday evenings, beginning October 6th.

"Our object in promoting these concerts," Mr. Wolfe said, "is to bring to people within reach of available hook-up facilities in Canada, music and artists which, without the medium of radio, could not be heard outside the great metropolitan centres. We do not regard radio broadcasting as a direct advertising medium and feel that it can function most usefully in purveying entertainment of educational and artistic merit. The aim of the orchestra and guest artists will be to broadcast classical music and modern novelties of more than ordinary merit."

The series, which will be known as The Imperial Oil Hour of Fine Music, will go on the air through stations CHYC, Montreal; CNRO, Ottawa; CKMG and CPBB, Toronto; CFCJ, London; CKRW, Waterloo; CKEY, Winnipeg; HWY, Regina; CFQC, Saskatoon; and CKLC, Red Deer.

**Sweden Leads the World**

Sweden today leads the world in the number of radio receiving sets in proportion to its population. The latest statistics show that there are 42,215 sets to about 6,000,000 inhabitants, or 67.5 for each thousand citizens.

Germany is holding many century celebrations this year.

**Tall Men's Association**

**Crusader Is Trying To Make Path Easier For His Elongated Brethren**

Things are coming to a sorry pass for tall men, Benjamin Ostling of Marshfield, Ore., president of the Tall Men's Association of America, indicated on a visit to Cleveland.

The tall man suffers no agony after another in Ostling's opinion, and the more he has to travel the more his troubles mount. For instance, take the Pullman berth, the standard size hotel bed and the regulation size bath tub.

Ostling is a crusader for the man who towers into the atmosphere six feet or more, and his firmly believes that the Tall Men's Association will accomplish something worth while in the way of added comforts.

The organization, formed in 1925, has nearly 1,000 members, most of them from the west coast, but Ostling predicts a steady increase during the next few years, because it is taken into this select group, he must prove his eligibility, which can easily be done with a yardstick. The only requisite is that he must be at least six feet tall.

"Tall men have to comb their hair, fix their neckties, and do other finishing touches to their dressing on the installment plan basis if the furnishings in his room are of the standard size," said Ostling. "Just try to imagine me taking a bath in a regulation size tub. It just can't be done. When a tall man sits at a regular sized table, all the pleasure of dining is gone because of the gymnastics he has to perform to keep his legs from hanging down to the table."

Some of the sufferers are, of course, tall men who are compelled to stay in hospitals and sometimes months in hospitals. The regulation hospital bed is not too large for the man of average height. Can you imagine a tall man comfortable in them?

The time has come when institutions catering to guests must take into consideration the tall man's plight and make provisions for their comfort.

Several hotels in the larger cities have provided special accommodations for their tall guests. Many hospitals on the western coast have at least a dozen beds in each building, for their tall patients, and one hospital has even a special operating table for tall men.

Ostling said there are at least 2,000,000 six-footers in the continent. And the ramifications of Ostling's campaign are not limited, because he even advocates larger jail cells for his even more unfortunate brethren.

**Saving In Train Haul**

Grain shipped from Saskatoon to Liverpool by way of Montreal and travel 5,213 miles. By way of Churchill it has to travel 3,791 miles. The distance between the two ports and Liverpool is about the same—the saving is in train and lake haulage in Canada and changes and re-loading.

**Take Off Over-weight**

Modern science says sugar supplies energy that lets you carry on with less food and safely reduce weight.

WIGLEY'S is pure chicla, sugar and flavor. Chewing the chicla dissolves the sugar and releases the flavor.

In this pleasant way you get needed body fuel and reduce the pounds.

**Remarkable Self-Denial**

Scottish Girl Saves Enough To Bring Family To Turkey

After having been only two years in Canada, Miss Jean Turley, late of Colburn, Lanarkshire, Scotland, has been able to bring her father, mother, and ten brothers and sisters to join her in the home which she has prepared for them in Montreal.

By denying herself every luxury—she has never been inside a picture show in Canada—and saving every cent of her wages as a servant, Miss Turley was able to save part of the large family's passage money, the remainder being provided by the British Dominions Emigration Society.

Miss Turley's father found work difficult to obtain in Lanarkshire, but jobs in Montreal have been promised to all members of the family old enough to undertake them. Miss Turley is now 23, and her brothers and sisters range from 21 to 3 years of age.

Speaking of the sacrifices which she had made for her family, Miss Turley said—"It is all over now and I am very glad to see them."

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using WINDOLITE in the home, the health-giving rays are therefore, the invention of WINDOLITE has completely satisfied the longest yearning of the scientific world. Experiments have conclusively proved that it is a most powerful and effective means of health which admits the Ultra-Violet rays, and that its use in the home has a beneficial effect on the development of plants and children and on the well-being of cattle, enabled for the first time to live in the light and freedom of darkness in their sheds.

Indeed, the use of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of fowls, and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light lusty through windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is essential, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanatoriums, beds, plant coverings and greenhouses. It keeps out cold—will not crack or drip—cuts with ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 125 to 130 lbs. Improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS and YOUR CATTLE live in the sun. Bank in 100% Sunlight Send for booklet "WINDOLITE"

with their daughter and son-  
in-law, Mr. and Mrs. G. M.  
Miller.

## R.M. Mantario No. 262

(Continued from last week)

The Secretary reported that  
E. S. Whitley, M.L.A., had  
communicated with him as to  
the advisability of some relief  
readwork being done in this  
Municipality and read a letter  
written to the Dept. of High-  
ways in this connection after a  
survey of the conditions as to  
crop, had been made by the  
Reeve and himself. No answer  
had been received to the  
communication, but two in-  
spectors had called from the  
Dept. of Highways to obtain  
information and make report  
on the situation.

Hawtin—That owing to the  
lateness of the season, the Dept.  
of Highways has requested to  
take immediate action on letter  
of Sept. 27th in regard to Relief  
Roadwork, and the location of  
the work recommended for the  
South camp be amended to read  
from the North of Twp. 26-29  
w. 3, instead of from the North  
of Twp. 25-28 w. 3. In  
regard to the North camp,  
of the locations recommended,  
the first choice of the Council would  
be the Marengo road E. of 18  
19-30 31 in Twp. 27-27 w. 3.  
Some work should also be lo-  
cated in Twp. 24-27 w. 3.

Betty—In the event of the  
Council being left to handle the  
relief work without restriction  
as to location, that the amount  
granted be apportioned to the  
divisions and the location of the  
work be left to the discretion of  
each councillor, with the under-  
standing that he will place it  
with a view to the greatest con-  
venience of those most needing  
relief—it being understood that  
each man taken on will be lim-  
ited to the amount set by the  
Department. It is necessary,  
the Secretary to call a special meet-

ing of the Council immediately  
on receipt of instructions from  
the Department as to the work,  
and each member of the Coun-  
cil now present shall and here-  
by waive notice of meeting in  
regard to Relief Road Work if  
such meeting be found to be re-  
quired.

Austrum—That account of J.  
C. Hughes for poundkeeper's  
compensation be paid. Corres-  
pondence was placed before the  
Council in regard to the claim  
of Mrs. Ellen E. Reid for com-  
pensation for right of way tak-  
ing for road No. 44 through 8 E.  
3-27 28 w. 3.

Hawtin—That the offer made  
Mr. Reid to the best offer of  
the Council, and that the Sec-  
retary be instructed to advise  
her that if she does not wish to  
accept same, to return cheque

which was forwarded to her at  
once.

Betty—That account for work  
on roads by G. Van Sickle be  
referred back, as the Council do  
not consider they are liable for  
same.

Ex Reeve L. C. Walker was  
present for the purpose of  
bringing to the attention of the  
Council the necessity that prop-  
er arrangements be made in re-  
gard to the treatment of pa-  
tients at the expense of the  
Municipality at the Ashok hos-  
pital.

Betty—That the Reeve and  
Sec. Treas. be a committee to  
approach the authorities in  
charge of the Ashok Hospital  
with a view of making arrange-  
ments as to the payment of pa-  
tient's fees, which will be in  
accordance with the Municipal

and Union Hospital Acts.

Austrum—Re account of R.  
Hunter. That he be paid \$20  
for work in hauling the elevat-  
or grader to Kindersley, and  
that all those extra expenses  
be charged against the machin-  
ery purchased.

Betty—That balance of hos-  
pital account over 60 days be  
paid the Empress Hospital as  
soon as it has been collected  
from the patient.

Hawtin—That account of  
Reeve for supervision general  
Roads 15-75 be paid. That an  
account of Co. Dahl, for super-

vision general roads, 18.00 be  
paid.

Council adjourned at 7.30  
p.m. to meet again Nov. 4th at  
the usual hour unless a special  
meeting is required, which  
shall be at the call of the Sec-  
retary and notice of which has  
been waived.

Sec. Treas. C. Evans Sargent.

Word had been received Oct-  
ober 8th, that an expenditure  
for Relief Road work has been  
allotted to this Municipality.  
Those wishing to obtain work  
for their Division at once.
